3. [REDACTED] is preparing a memorandum for you wherein he will give you the scheduling of the contracts. In essence, the image correlation prototype will precede the edge enhancement because some of the problems on which edge enhancement depends will be solved by the correlation prototype. The problems solved by the edge enhancement prototype will solve many of the problems necessary for the Nadir Location study. Concerning the latter, I am definitely interested in it and will write a staff study recommending a contract negotiation.
